

Reactec's online training provides an in depth 2 hour training session which will focus on the Analytics Platform and is aimed specifically at management.

All training material that is used throughout the session will be provided for future reference. An option to have your session recorded for future reference is offered at the start of the session.

Pre-Training Preparation:

1. Successful HAVwear implementation:

It is essential that you have completed the installation of the HAVwear devices, either from watching our training videos, or having received our Online Installation training.

2. Access to the Analytics Platform:

Ensure that the relevant people have been added as Users to the Analytics and are present at the session.

Training Agenda:

1. Access to and navigation of the Analytics Platform
2. Understanding the Dashboard
3. Key HAVS reports including: Workforce Average Exposure; Exposure Levels Reached; Operator Average Exposure and Control Measure Analysis
4. Key Tool reports including Top Tool Exposure and Tool Vibration Trends
5. Key Resources reports including Spot Check and Devices Signed Out
6. Filtering data and set up/management of automatic reports
7. Creating new Users and setting up of automatic Daily Alerts
8. Setting up understanding Groups
9. Creating and managing Control Measures and Interventions
10. End of session review
